Read more A private server provider for the mobile version of Minecraft has admitted that more than seven million account details were stolen in January. Lifeboat Network requires users to sign up with an email address and password before using their servers on Minecraft Pocket Edition. Security researcher Troy Hunt told Motherboard that the company's data was breached back in January, exposing millions of users' information - but stated that the company failed to notify any users of the attack. When this happened [in] early January we figured the best thing for our players was to quietly force a password reset without letting hackers know they had limited time to act, a representative of We did it over a period of a few weeks. We do not keep any personal information (name, address, age) about our players, so none were leaked. We have not received any reports that anyone has been damaged by this. However, Hunt said that passwords accessed by hackers were only encrypted using MD5 hashing, allowing him to decode them using readily available online tools. The lifeboat said it had implemented a stronger algorithm in response to the situation. Minecraft is a game about building blocks, but it doesn't end there. Minecraft PE/ Minecraft PE Hacks 25 Jul, 2017 Attention: The use of cheats and hacks is quite a dangerous obsession and as a result you may be banned on the server. But if you like to take risks and don't be afraid... BersMagePE Hacking Client: - Small update: Added 2 new features. How to install:Download Blocklauncher and dowload this mod. Open Blocklauncher. Enable ModPE Scripts.Import my mod using the import button in Blocklauncher.How to use:After installing mod, type client in chat to enable hacking mode. You can't use any hacks without activating hacking mode. To see all available hacks type one of the following commands in the chat: info, info2, info3, info4Now it should look like on the pictures. If you have found a hack you need to type the command next to the hack name in the chat. Example: Speed /sp you have type sp in the chat to activate the speed. To disable any hack write the command again in the chat. If you want to disable all hacks at once write client again in the chat. Explanations: Some hacks are self-explanatory, but a few should be described a bit more. To see which hacks you have enabled write statistics in the chat. Slide: You slide down if you fall. Nofall: Made for skywars. If you fall from a higher place, you get teleported back. Teleport: You teleport where you press the ground. Health: See enemy health. Not multiplayer friendly. Jesus: Go over the water. Orefinder: Searches for ores under your feet and alerts you if anything was found. Digger: Teleportation in the ground. Mount: Mount other players and kill them from above. Not Nocheat friendly :-/ . Assault: Kill other units with 1 hit. Not multiplayer friendly. Slide: Jump very far. Climb: Climb up walls like a spider. Changelog:Added slide functionTilsat climb functionThanks to use BersMagePE.Leave a similar. To install Minecraft PE Mods Mods
