The beginning of college can be overwhelming, even for students who have attended college-level classes in the past. Knowing... Article 4 of the United States Constitution defines states' relations with each other and their relations with the federal government. Section 1 contains a clause of full faith and credit which obliges each State to extend its recognition to society and the legal acts of other States. Section 2 denies criminals the opportunity to flee to other countries in order to escape justice. If the offender is detained in another country, he is to be sent back to the jurisdiction where he was convicted. Section 3 lays down rules for the admission of new states to the Union. Section 4 is a guarantee to the federal government that states benefit from the Republican form of government, and that the federal government defends them against invasion domestic violence. These studies of state entities are aimed at helping children geography of the United States and to know the actual information about each condition. Did you know that Illinois was the first state to ratify (accept) the 13th Amendment to abolish (end) slavery? Did you know that Illinois is where Abraham Lincoln spent most of his life? Named Illinois Indian, Illinois is the best supplier of soybeans and corn and is also known for producing pork and dairy products, livestock, and grains. Chicago, one of the largest cities in the U.S., is a national railroad junction and has one of the busiest international airports in the country. The state is also known for its skyscrapers: the Willis Tower, which stands at 450 meters, and the neo-Gothic Tribune Tower. The motto of the state, the Sovereignty of the State, the National Union, appears on the state flag and the state seal. This was controversial after the Civil War, when national unity was particularly important, so state lawmakers required the flag and seal to be twisted to put National Unity on top. Illinois has a very diverse population of more than 12.5 million. In this article, you'll learn interesting facts about Illinois, including historical facts about Illinois, Illinois history timeline, geography facts, and more. Time4Learning members can download our list of prek-12 interactive activities, comply with your Illinois study. Here are some Illinois facts for kids: kids: State: December 3, 1818 Order to join the Union: 21st State Capital: Springfield State Abbreviation: IL Border States: Wisconsin Indiana Kentucky Missouri Iowa State Flag: State Song: Illinois State Flower: Purple Violet State Nick: The Prairie State Land of Lincoln Notable Illinoisans: Harrison Ford, actor Hillary Clinton, former first lady and politician Jennifer Hudson, singer and actress Jaimee Foxworth, actress Michelle Obama, former first lady Robin Williams, an Illinois actor's story dating back to 8000 AU, when Native Americans lived along Illinois waterways. Some of the tribes known to have lived in Illinois include the algonquian-speaking people of Kickapoo, Sauk, Fox, Potawatomi, Ottawa, Ojibwa (Chippewa), Kaskaskia, Peoria, Cahokia and Tamaroa. The first Europeans came from France in 1673, but France gave up its claims to Illinois to Britain as a result of the French and Indian Wars. In 1773, as a result of the reluctance of British politics in the region, the number of settlers fell to about 1,000, plus several hundred slaves. After American forces captured Kaskaskia, the place of the British government of the region, Illinois became the county of Virginia. However, Virginia later gave the area back to the newly formed United States, forming the Northwest Territory. When the Northwest Territory was divided in 1800, Illinois became part of the Indiana Territory, and then the Illinois Territory was established in 1809, when Indiana's territory was divided and later became a state. As a state, Illinois has become a leader in social policy, economic progress and cultural growth. She created laws protecting children in the 1880s and 1890s and was the site of the 1893 World's Columbian Exposition, presenting America's technological and scientific advances. Chicago became the second largest city in the U.S. in the 1880s. The first atomic chain reaction took place at the University of Chicago in 1942, beginning the atomic era of the country. All the while, however, Illinois has struggled with violence and scandals as a result of bootleg (illegal) alcohol, organized crime under the notorious Al Capone, Ku Klux Klan activities and coal strikes. While the state still has higher rates of violent crime, its cultural growth continues. Chicago has become a center of art, writing and research. There is a rich film history, and the area is known for its theatre, dance, orchestra, opera, jazz and blues. Chicago has also become an architectural leader, and its buildings are becoming role models for the world. Read the Illinois history timeline below to learn the important facts of Illinois history through the events that took place in that state. Come to life history and geography with time4Learning's interactive social studies program for grades 2-12. Illinois is mostly flat with agricultural areas, forests, wetlands and Hills. The northern, southern and western parts of the state consisted of plains that were covered with tall grasses before the land was used for farmland and cities. The southernmost part of the state is unique because it has not been affected by glaciers and contains a large part of the land known as the Shawnee National Forest. The first settlers goed the state of its wood, leaving only 10 percent of the forest cover. There are hills in the northwest corner of the state, including the highest point on Charles Mound, as well as gently sloping hills in southern Illinois. The soils of northern and central Illinois are excellent for breeding, and about 900 streams flow into the Mississippi River system. The whole state is located on natural underground reservoirs. Due to pollution and decline in forest areas, abundant wildlife that developed in Illinois (i.e. bears, wolves, bison, mountain lions, elk and porcupage) disappeared. The deer went extinct in 1910, but were re-introduced in 1933 and regained their population. Coyotes, foxes, migratory waterfowl and some species of fish can still be found in natural areas and more in urban areas. Check out this Illinois map to get to know the state. Then read the following facts of Illinois geography. Print the Illinois map below and add these items to the map. Illinois borders Wisconsin to the north, Iowa to the northwest, Lake Michigan to the northeast, Missouri to the west, Indiana to the east, and Kentucky to the southeast. The capital Springfield is located near the west-central part of the state. Its largest city, Chicago, is located in northeastern Illinois, on the shores of Lake Michigan. The city of Cairo, known as Little Egypt, is located on the southernmost tip of Illinois. The Mississippi River flows along the western border of Illinois. The Illinois River divides the northern part of the state from north to southwest. The Ohio River connects to the Mississippi River at the southern end near Cairo. The highest point in Illinois is Charles Mound, a 1,235-foot hill near the small town of Scales Mound, in the northern part of the state. The lowest point in the state is on the Mississippi River (279 feet) in Cairo, on the southern tip of Illinois. How else can you learn funny facts about Illinois? Try to visit some of the unique places in the state. Homeschoolers in Illinois can take a trip, while those simply visiting can make a list of places they would like to see. Here are some ideas to help you learn some Illinois facts: The Art Institute of Chicago (Chicago): Explore this art museum, which includes collections capturing city landscapes, animals, fashion, mythology and local themes. See works of art that represent impressionism, pop art and diaspora. See museum essentials such as American American (1930) and works by Salvador Dali, Vincent van Gogh and Claude Monet. Field Museum of Natural History (Chicago): Discover nature and culture over time through exhibits on ancient Americas and dinosaurs (including the famous Sue the T. Rex), encounters with worms, the interactive Grainger Science Center, and the Crown Family PlayLab (for younger students). The museum's collection grew out of items displayed at the World Exhibition of Colombia in 1893 and now has nearly 40 million artifacts. High school students can spend the day behind the scenes in the Saturdays program. Watch out for days of free admission all year round. Museum of Science and Industry (Chicago): Capture the true essence of Illinois in this museum, focusing on creativity and innovation. See exhibits ranging from bike art and automated toys to submarine U-505 and clothing technology. Explore genetics through a chick hatchery and a scientific storm exhibit. Get involved in production design or experience flight and space walking simulators. Check out the calendar for exciting opportunities, such as dinner with a periodic table or after-hours museum events. Navy Pier (Chicago): Originally completed in 1916, the Navy Pier was reopened in 1995 and has since seen more than 180 million visitors. Enjoy 50 acres of lakefront experiences and attractions. While many attractions require an entrance fee, see the calendar to find free outdoor movies, jazz concerts, art exhibits, dance performances and more. Looking for more things to do with your kids in Illinois? Check out this post full of ideas for a trip to Illinois! Illinois Freebies and Offers for Homeschoolers Can also learn more Illinois facts and information without spending a lot of money.
