This applies most to Arena content, but most of the talent and racial bonuses will work in Rated Battlegrounds and skirmish. If you are looking for WoW Classic content, please refer to our Classic Shaman PvP guide. 1. The upgraded shaman has flown under the radar as far as damage goes. Although their ongoing damage is low, what makes them frightening is how powerful their explosions are. With tools like Cleaning to eliminate important enemy buffs and Heroism/Bloodlust can be used in Arenas they are certainly a threat to any 2nd class. Shaman Upgrade Power 3. Weakness Enhancement Shaman Very little cooldown defensive Damage depends on the uptime predicted burst damage 4. The content of this Guide Guide ended up very long, so we decided to share it on a different page. On the Enhancement Shaman PvP Talents page, you'll find analysis of each PvE talent line to help you decide which talent to choose on each line, as well as an overview of PvP talent, which suggests which to pick up and under which conditions. On the Enhancement Shaman PvP Rotation and Playstyle page, you'll learn how to use your spells, depending on the situation (damaging, surviving, controlling enemy players, etc.), and what to expect from your classes and specifications in PvP. On the Enhancement Shaman PvP Azerite Traits and Essences page, you'll find suggestions on choosing the best essence strength and the best azerite properties. On the Enhancement Shaman PvP Stat Priority and Gear page, you will find top priorities to follow at and suggestions for choosing your equipment, especially Azerite trinkets and fittings. On the Enhancement Shaman PvP Best Races page, you will find a list of and race Hordes, ranked by how good they are for Enhancement Shamans in PvP, as well as explanations of why and how racially they benefit you. On the Enhancement Shaman PvP Useful Macros page, you'll find a useful collection of macros for PvP for Enhancement Shamans. On the Enhancement Shaman Arena Composition page, you'll find a list of arena's most powerful compositions featuring Enhancement Shamans, in 2v2 and 3v3 modes. 5. Show more Show less I'm currently thinking about switching to enhancements from elemental to 8.3 to pve (m+, raiding and vision) seems a little more fun as as Me. But what holds me back is I don't know if I'll be able to push for a decent ranking (the goal is to get 2.4, sit around 2.2 this season) as a shaman of improvement. What do you think?
