Craftsman 10 inch table saw model 315 parts

11-02-2010, 10:30 p.m. #1 inherited my father's old Artisan table saw. While in storage, the motor mounting plate broke, as did the front rack of the original tear fence. Any suggestions where I can find spare parts? Otherwise, the sawmill is in considerable original condition, so I would like to have it as another sawmill. Google Sponsor Google Sponsor 11-02-2010, 22:39 #2 CM tools it's nice to have a great parts organization. Google Sears components are straight. You need the model number of the saw, but you should find it on the saw board. Good time! Remove the full blade, no, for too long, now remove the 1/2 blade, no, too long, now take off the 1/4 blade - How can H--- be 1/4 short???? 11-02-2010, 22:39 #3 Rob, Old is a very relative term. At 63, I don't call anything old unless it's from the '50s when I was a kid. :-) Your best chance of finding old artisanal OWWW.org on the Boyd (Bring Out Your Dead) buy/sell forum. Join the group and post the WTB (do you want to buy) ad. Include saw serial number and photographs of saw and broken part if possible. They love to watch pix nice older machines. I'm sure the boys can fix you! Last supplied by Chip Lindley; 11-02-2010 at 10:41 PM. Check out the table saw section under the tools and you'll probably find people who may not have exactly what you need, but can fix some of the machines they're about to share. Ask them. I've been lucky. 11-04-2010, 1:16 AM #7 If you don't get answers here, try OWWW.com....Old Wood Working Machines..... They might know. Ken 11-04-2010, 10:10 AM #8 Depending on how seasoned your saw is, can find one in the CL and save some other parts of it. 11-04-2010, 1:21 pm #9 Rob, I have a rack (and also a fence) 113.27521. If this is your model, you're welcome for either or both deliveries. Mine was also my father, and I replaced the stand from partsdirect in 2000, when they were still carrying these old ones. Earlier this year, I put on a Delta T2 worth considering. Jim 11-05-2010, 9:33 am #10 Jim Burke's offer doesn't work, take the engine mounting plate to the machine tank. It shouldn't cost too much.
