## Pond filter media rolls

Dott fine white & beige thick filter roller. Traps debris efficiently. Easy to clean. Easily cuts to the desired size with scissors. Item # of Pads Thickness Dimensions Color Add The advanced filter media for today's serious pond enthusiast. A look at Matala® will convince you of its practical and veritable qualities. The 3 3 open aerobic and highly aerobic dimensional structure 3 3 promotes healthy water conditions and ease of cleaning in most non-pressurized filter designs. Matala® is a filter media that is simple and works. The various densities can be used in sequence or separately for unique filtering requirements. This is one of the greatest features that Matala has to offer. No other media on the market can perform this step-wise filtering. Matala effectively snares large particles into small particles and still maintains a very aerobic and water-free flow without channeling. Matala is slightly floating and will not sink to the bottom of your filter. Matala stood vertically at the tip will not float. Matala stacked horizontally will hold each other down. Due to its stiffness, the Matala can be stuck in place in the unsupported filter. A half leaf of Matala has the following features: Long Duration When Dirty- Rinse and Reuse, Easy as queetively cut to any size you need A half sheet is 6.5 square feet of 8 square feet. equals 1 cubic meter of media A half sheet is equal to 0.8 cubic feet or 6 gallons of Semi-Rigid Volume, Self-Supporting and Non-Brittle Item Density Dimensions Add Item # of Pads Thickness Dimensions Add Item # of Pads Thickness Dimensions Add Item # of Pads Thickness Dimensions Add Dimensions Add © 1996-2015, Amazon.com, Inc. or its Affiliates Aquascape Coarse Filter Media Rolls provide efficient mechanical and biological filtration, reducing maintenance and improving water quality. Bulk rollers provide the ability to cut the material precisely for the shape and size of any pond filter, useful in a wide variety of applications. The roller is 10 feet long and 56 inches wide. Thick and thick media is the most popular media used in skimmers and biological filters. Aquascape is passionate about the products we produce, providing exclusive products, designs and features that are above the competition. \$299.98- Provides mechanical and biological filtration- Coarse filter media roll- Ability to cut material to the desired shape- Popular media used in skimmers and biological filters- Roll meters 10 feet long and 56 inches wide Designed by Techno Goober Page 2Page 3 JavaScript seems to be disabled in your browser.
