(0) Nothing more - Information on the Journal issn / EISSN: 0301-0511 / 1873-6246 Current publisher: Elsevier BV (10.1016) Total articles ≈ 4846 Current coverage in SHERPA/ROMEO EBSCO Wataru Sato Takanori Kochiyama, Sakiko Yoshi Published: 1 November 2020 Biological Psychology, Volume 157; doi: 10.1016/j.biopsycho.2020.107974 Abstract: Exploring the ability to correlate the core of emotional states has theoretical and practical significance. Previous studies have reported that valence and arousal correspond to facial electromyography (EMG) and electrodermal activity (EDA), an ally, through stimuli. However, the reported results were, no study centered-over time, and measures of arousal remaining. To search for these issues while healthy adults (n with 20) viewed emotional films, we evaluated the overall and continuous evaluation of bravery and excitement and recorded EMG of corrugated supercilia and zygomatic major, ECA of palms and forehead, nose-tip weather. Corrugated and zygomatic EMGs were negatively and positively associated with valence evaluation, respectively, through stimuli and time. It should be noted that emotional valence and excitement dynamics have specificity correlated. Back to top Isi web knowledge: P sycINFOPsycARTICLEElsevier (SDOS) Wiley Springer OvidSageIngentaJSTOR Personal Experience: I'm just getting started the most used is Elsevier, where journals of psychology and cognitive neuroscience are more comprehensive, and even some of the journals APA (but only abstracts, -), and cell journals such as Neuroon, Trends in Cosco Sciences are available to download the full text here. Also using Wiley more is Wiley, where NB human brain mapping, psychophysiology and other Sage databases are well worth mentioning because the Association for Psychological Sciences (APS) journals are basically here. The APS's flagship magazine, Psychological Science, is estimated to be loved by many drop friends. Later search for specific documents, the main use of Google, the title of the Google article that the database belongs to, to which, so convenient. But when article information is uncertain, it still depends on the database! 2014.10.05 Update: Google Scholar is undoubtedly the most suitable choice for searching for documents. 2. Journal 1 General Journal: Such journals include advances in various fields of natural sciences, with the latest and most influential articles in this field appearing from time to time, Nature, 5/30.432Science, 10/26,682PNAS (Choirs of the National Academy of Sciences, quality is good or poor because there are said, make academics) Nature Communication (Nature is an open access journal, based on natural sciences, publishes a small number of basic studies in psychology, impact factors similar to PNAS) Scientific Reports (PNAS) Nature is an open access journal, the last impact factor is greater than 5) PloS one (note: this journal is an open approach, the impact factor is between 3 and 4) 1.1 Journal of Neuroscience: This type of journal covers all aspects of neuroscience, from time to time there are literature related to cognitive neuroscience nat neurosci, 14.34 Neuron - 13.26 Journal of Neuroscience 7.17 Brain (9.23) Cerebral Cortex 4,058 Journal of Neurophysiology (3.3.348) NeurosciencNeur Science LettersNeuroscience ResearchFrontiers in Behavioral Neuroscience (4.2) Frontiers in Human Neuroscience (2.9)2 Reviews and reviews of these journals are essentially generally round-up articles, generally invited to cattle, very remarkable!
