In addition, you may need a CourseID, provided by your instructor, to sign up for and use Pearson's MyLab & Mastering products. Package Access codes for Pearson's MyLab & Mastering products may not be included in the purchase or rental of companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed earlier and you may need to purchase a new access code. Access codes Access codes purchased from sellers other than Pearson entail a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller before purchase. -- Apply philosophy to everyday life. Core Questions in Philosophy emphasizes the idea that philosophy is a topic devoted to evaluating arguments and constructing theories. Presented in an engaging lecture-style format, this text/reader focuses on the basic questions and ideas of philosophy with lectures/discussions, supported by readings from historically important sources. Discussions emphasize the logic of philosophical arguments and how they relate to the content of modern physical and social sciences. Teaching & Learning Teaching TeachingThe teaching and learning experience with this program helps to: Improve critical thinking – Reviewing questions at the end of each chapter allows students to review what they just learned and think critically about related problems. Engage Students - After a lecture format, the text part is written in an engaging conversational tone. Explore Theory - Emphasis on evaluating arguments and constructing theories. Support Teacher – An instructor's manual, test bank, MyTest test bank, and PowerPoint presentation provide more teaching resources. Core Questions in Philosophy emphasizes the idea that philosophy is a topic devoted to evaluating arguments and constructing theories. Presented in an engaging lecture-style format, this text/reader focuses on the basic questions and ideas of philosophy with lectures/discussions, supported by readings from historically important sources. Discussions emphasize the logic of philosophical arguments and how they relate to the content of modern physical and social sciences. Improve critical thinking — Reviewing questions at the end of each chapter allows students to review what they've just learned and think critically about related issues. Engage Students – After a lecture format, the text part is written in an engaging conversational tone. Explore Theory – Emphasis on evaluating arguments and constructing theories. Support Teacher – An instructor's manual, test bank, MyTest test bank, and PowerPoint presentation provide more teaching resources. Sober is a real philosopher and the clarity of his thought helps this book immensely. - Sean Stidd, Wayne State University I definitely think the author wrote this book with the student in mind. Although the ideas presented are difficult, the author does a good job of explaining the theories without dishonoring the philosophers' theory. So many text destroy the power of the philosophical thought because they to make the idea 'understandable'. That is not the case in this text. I thought the explanations were spot on. - Louis Howe, Jr., Central Connecticut State University Sample chapter is available for download in PDF format. APPLY PHILOSOPHY TO EVERYDAY LIFE. Discussion of philosophy of religion, Epistemology, Philosophy of Mind and Ethics provides a coherent introduction and a solid foundation for this branch of philosophy. (ex. p. 41) The most important areas covered in the text—the philosophy of religion, epistemology, philosophy of mind and ethics—are interconnected to create consistency. After a lecture format, the text part is written in an engaging conversation alone. Provides the basic background required for a simple understanding of the readings and provides students with a sense of the continuity of the philosophical tradition from the past to now. In each of the five parts of the book authorwritten chapters are followed by related readings (taken from Plato, Aristotle, Aquinas, Anselm, Descartes, Locke, Hume, Kant, Mill, and others). (ex. p. 130) Emphasis on evaluating arguments and constructing theories continuously reinforces the underlying purpose and method of the philosophical process to students. (ex. p. 83) IMPROVE CRITICAL THINKING Each chapter is followed by review questions and thought-provoking problems for further reflection. Complete Pedagogy, including chapter summaries, margin notes, discussion questions, problems, and glossary help students better understand and review information. Fully revised, simplify and clarify the exposition. Revised material on compatibilist theories of free will (ex. p. 256) More readings have been added including: Plato's Theaetetus and Euthyphro (ex. p. 198) Peter Singer's essay Hunger, Affluence, and Morality (ex. p. 380) An excerpt from Hans Reichenbach's The Rise of Scientific Philosophy.
