Playhome futa mod

Make sure you have BepInEx and BepisPlugins installed for a variety of plugins to install PlayHome. Download the latest release here. Place the dll file you want in the folder PlayHome\BepInEx. Plug-in PH_AltAutoMode alternate auto mode for H scenes. This plug-in can control the speed of the animation by editing the full auto mode, but not the pose. There are also some additional randomizations to make the pose change feeling more natural. PH_ConfigurationManager is an easy way for users to configure how plugins behave without having to create their own GUI. Users can change keyboard shortcuts during the settings they are exposed to. The configuration manager can be accessed from the in-game settings screen. Most plugins in this pack can be configured in this plugin. Some settings are hidden under advanced settings. A tutorial on how to create a compatible plug-in with configuration manager. PH_MessageCenter, the plug-in displays a pop-up text message in the GUI each time it posts a message event. A patchless version of PH_MoreSlotID_Bep PH_MoreSlotID_Patcher. This means that you don't have to overwrite the file. PH_TogglePOV togglepov plug-in recreation from Honey Select. Configuration Manager and Message Center are almost directly copied from the Beppice plug-in repository. Thanks to Marco and Beppice. Category: Date: 2020-05-21 12:37 UTC Submitter: 46 Info: Leechers: 17 File Size: 34.0 GiB Completion: 9191 Info Hash: 8 99 41d00d4fb7c0496bd39e534028f84888ddddd plugin adds more character customization settings to the character maker of various games created by fantasy. These additional settings are stored inside the card and used in the main game and studio. It is possible to change the height of the man, create a handsome thick neck, customize the skirt, and resize the hands and feet. Support games: Playhome (PHABMX) Koikatu/KOIKAMX Party (KKABMX) Emotional Creator (ECABMX) Ai-Shoujo/Ai-Syoiyo (AIABMX) Honeyselect 2 (HS2MXMX) How to use at least BepInEx 5.0 and the latest modding API. Download the latest release for the game here. All you need is the right version for your game. Extract the release into the game directory. The dll file must end in the BepInEx\plug-in folder in the game's directory. When you start character maker, you'll see new settings and categories. The ABMX setting is highlighted in yellow. Turn on the advanced window in the lower right corner of the KK/EC and set up the Plug-in in The AI (you can press F1). Originally changed from ABMThis is an upgraded version of the original Koikatu ABM/Bonnemode plug-in. Resolve suptling and multiple issues while adding new features. Added bone position and rotation adjustments added to the add-on advanced editing UI bone search and added integrated into the control character maker interface Improving bioconvenience, adding the ability to have different skirt bone settings for each costume type improved performance, no longer longer no longer delete .txt files anymore, save all the cards themselves (still read .txt files and delete them after saving the card again) refactoring and cleaning up the source code, Many screenshots of useless fat grooming -->> Honey Select MODS Pack 01 & It;!-- CONTIENE Ashley Graham Chambers Rebecca Gina Pauley Claire Redfield Helena Harper Jessica Sherawat Castanic Gown 16 Magic Snow White White Tail Red Witch Voguish and Nano Bikini Heavy Armor Set 04 CruX Leather Long gown Myuria Battle Clergy Heavy Armor Set 27 Rebel Vampire Slayer Chun-Lee Black Gown Helgast Sniper Kane 2B Yumi x Didumode (Senran Kagura) Servidores descarga disponibles : Google Drive, OneDrive, Dropbox, MediaFire, Mega, 4 Shares.
