Or more specifically, new to NutriBullet? You've come to the right place! Use this blog post as your guide to getting started. Step 1: Uninstalling Your NutriBullet Whether you're shaking Magic Bullets, Rx, 600, or PRO first steps is always the same. Unplug your bullet. Turn off all the plastic, pair it, and get yourself and your Bullets located. Step 2: Make a Smoothie, Any Smoothie Look in your fridge and refrigerator. What do you have in hand? Let's say you have spinach, banana, ice, chia seeds, and almond milk. Start with leafy vegetables, then add the fruits, seeds, and your ice. Let your liquid survive. Smoothie Making Tips: Ice just needs to occupy 25% of the cup, nothing more than that. The liquid should always be added last. Each cup has a Max line, not adding any food or liquid above this line. Blades need to be able to rotate and extract effectively and go over the Max line can make it difficult for your ingredients to combine altogether. It can also cause leaks, and nobody wants that. DO NOT add anything hot or carbonate to your Bullets. This causes pressure to build up in a cup and can lead to mess or damage, so there is no hot coffee, no hot food, and no sparkling water. Step 3: Mix You have your smoothies built, now you're ready to combine them! Tight screws extract (the bullet blades you came up with) to your cup. Make sure it is safe so that there are no leaks during your mix. Then set the cup with the blades attached to the base of the motor. To lock the cup in place, rotate the cup in the direction of the clock while pressing the cup down, this locks it in place and for a hands-free mix. Note your smoothie, it should take 30-60 seconds to combine the right consistency. If any material gets stuck or if they have stopped moving, twist the clockwise cup to stop it and consider adding more liquids to get everything moving again or shaking the cup to get rid of the blocked ingredients. Then the cup locks back to its place and continue licensing. Once your smoothie looks well cuminated, stop the Bullet by twisting the cup clockwise. The cup will appear, the motor will stop, and your smoothie will be ready! Step 4: Drink Your Smoothie Remove the blade, screw on the lip ring to cover the grocos on a smoothie cup and sip! It's as simple as that. Taking your smoothies anywhere? Screw on the lid over the flip to go and exit the door. Step 5: Cleaning the Dishwasher trophy is safe on the top shelf but the blade needs to be washed hands. Gently wash the blades with hot water and a careful sponge, it is the blade after all. Note that gaskets cannot be removed from the blades. For more information on gaskets, click here. If your motor base requires cleaning, use a cloth to eliminate them but remember to first unplug your Bullets. If it requires more thorough cleaning, use warm soapy water and toothbrush to crush it in it. Wipe it clean and let it be broadcast dry before reusing it. Ready to make your first smoothies?
