Popcorn Time.app Version 4.0: Popcorn Time APK Popcorn Time! Many developers and designers are the result of putting together a bunch of APIs to create a torrent movie viewing experience As much as possible, the new and improved Popcorn Time allows you to watch movies and TV shows online for free in HD or SD with subtitles. It is now also available for Android. We are an open source project. We are from all over the world. We love our movies. And boy, do we love popcorn. Good movies we are constantly searching all over the web for the best torrents from the most important sites. You can watch as many videos as you want without restrictions. All you have to start with is a proper internet connection. If you have a great catalog movie out there, Popcorn Time will find the best version possible and start streaming right away. Watch movies instantly with hd and subtitles for the best quality. And keep an eye on it. Recent improvements you can now drag and drop subtitles (.srt files) into the player to load them. This means you can now drag and drop external torrents and stream them to Popcorn Time with external subtitles. Finally, you've added a watch icon to the episode you played, and now you can manually set it up as you watched the video, making it easy to update your progress. A child icon indicating whether the video has been watched or not, and we have not forgotten our power users. It has been requested because we have acquired the project and with Popcorn Time Beta 3.1, you have the option to keep the downloaded files after you quit popcorn time. Advanced settings files are not shared through P2P after you see it. But wait, it's not over: regular performances have been improved, our subtitle selection is stylish, new languages (hello Croatian, Thai and Vietnamese, please some popcorn!) and ...
