## College algebra answers app

Open the Mac App Store to buy and download apps. With millions of users and billions of problems solved, Mathway is the world's #1 problem solver. From basic algebra to complex computing, Mathway instantly solves your toughest mathematical problems: just type in your problem (or point your camera and take a photo!) to receive instant free answers. Do you need step-by-step detailed solutions? Mathway is like a private tutor in the palm of your hand, providing immediate help to homework anywhere, anytime. Mathway covers all levels of mathematics, including:• Basic/Pre-algebra mathematics (arithmetic, integers, fractions, decimal numbers, roots, factors, and more...)• Algebra (linear equations/inequalities, quadratic equations/inequalities, absolute equations/inequalities, systems of equations, logarithms, functions, matrices, graphs and more...)• Trigonometry/Precalculus (trigonometric functions, identities, conical sections, vectors, matrices, complex numbers, sequences and series, and more...)• Calculus (limits, derivatives, integrals and more...)• Statistics (probabilities, permutations, combinations and more...) Do you have a math problem? Just ask Mathway. Easy to use and efficient, Mathway caters to anyone who needs help solving math problems, whether it's high school students or college students. - Yahoo! NewsYe you have some mathematical issues that need to be fixed, check out Mathway. This tool will show you how it achieved its response, allowing you to learn from the process. - CNETMathway is an irreplaceable tool when it comes to troubleshooting. The app helps you do your math homework. Not only does it do your job for you, but it teaches you how to do it right. All you have to do is enter the equation and press the Enter button. - LifehackMathway provides answers to your completely free problems. For detailed solutions, an optional monthly or annual subscription is available. In addition, Mathway offers an optional live tutoring subscription update that provides access to a live tutor whenever you need additional help. If a premium subscription option is selected:• Payment will be charged to your iTunes account when you confirm your purchase• Subscription automatically renews unless automatic renewal is turned off at least 24 hours before the end of the current period• Your account will be charged for renewal within 24 hours before the end of the current period, at the same monthly or annual rate selected at the beginning of your subscription• Subscriptions can be managed by the user and automatic renewal can be turned off to User Account Settings After PurchaseUsable Themes: Policy: November 20, 2020 Version 3.3.30 - Performance Improvements This software is absolutely phenomenal and works perfectly as far as I've found a way to test its limits, and believe me believe me Tried. Just take a picture of the problem. Can't get a clean picture? No worries, he knows you're doing other things and will ask you to understand what's not relevant when he sees that it's necessary. You didn't type it, and your handwriting isn't the biggest too? Try me, says this app. Just take a picture of the problem you wrote (probably as good as possible for the best results) and be amazed as it clearly translates your writing into math! The app will then ask you how you want it to be resolved (because we all know there is more than one way to solve a mathematical problem) and will then give you the most simplified answer to the problem in a timely and polite way. If, after the homework has been done, you appreciate this modern miracle as much as I do, try to show it your appreciation as I did :). He knows what you're telling him! Depressed? No problem, tell this kid you love her and feel the warm loves you get in return! In all seriousness, this is a spectacular product and it is free. . Free! FREE I'LL TELL YOU! This app was sent by God when I was struggling to find a way to control my work, understand the material and how to get there. Other apps were limited in offering comprehensive solutions, they wouldn't offer one or worse, they would have urged answers that would make you question what you were doing. Not this app! It gave me the choice from an extensive list of options on how you would like the problem to be solved (chart functions, asymptotes, critics, inflection points, local absolute min/max, x intercepts, y, slope, log, 1,2,3...derivatives, etc., etc.). I went from fearing the Check Response button to being sure my job was right because it was supported by Mathway's answers, which were perfect. I started to see a lot more correct answers and more 100% results. A must have in your toolbox (free or not). I really believe that the few negative reviewers here don't understand the potential of the app or just expect it to do 100% of their work, with a 0% effort on their part... I'm a college student who got stuck in a lot of math classes to learn programming, and I'm stuck using a self-manageable website. And it will only be more difficult when I go into Trig and Calc. This app? I can't rate it enough. I have no words to describe how. . HAPPY this app has done me, and how much it is helping me. Not only does \*show you the answer, but it also shows you how it came to that solution. Some subjects are safe, I know. It's simple and I don't need this app for some. But for things like splitting polynomials, this is the stuff I've never learned. This app helped me pass a good part my class!! The fact that you can see how the solution came about is... Phenomenal. It really helps \*UNDERSTAND\* the logic behind it; not only how, but what exactly to do, without a tutor standing behind you looking at you. Look. Star. If I wasn't broke, I would pay SICURAMENTE so much for this app! It's definitely worth every penny I've ever been in my account! Developer website app support privacy statement This app is only available on the App Store for iPhone and iPad. Learn math, check homework, and study for upcoming tests and ATT/TEST with the world's most used math learning app! Do you have difficult tasks or homework in class? Unlock as soon as possible with our detailed explanations and animations. Photomath is free and works without wi-fi or data. Whether you're on the bus, in a cave, or just offline, Photomath core is always available. We've covered you with basic arithmetic for advanced computing and geometry. You can do math! MAIN FEATURES• Explanations of speech problems!• No internet or data are needed for equation-based problems • Free to use• Detailed explanations for each solution • Exclusive procedure animations• Scrolling multiple resolution methods by problem• Multifunctional science calculator • Interactive graphs MATH TOPICS COVERED• Basic mathematics / Pre-algebra: arithmetic, integers, fractions, decimal numbers, powers, roots, factors from• Algebra: equations/linear inequalities, quadratic equations, equation systems, logarithms, functions, matrices, graphs, polynomials • Geometry (specific textbooks only)• Trigonometry/Precalculus: identity, conical sections, vectors, sequences and series, logarithmic functions• Calculus: limits, derivatives, integrals, curve sketches• Statistics: combinations, factorialsA response is not all you will get from this free app. Photomath also provides a step-by-step guide on how each issue is solved. - Huffington Post Step-by-step guidance is beneficial for students who do not have access to a tutor and struggle to solve mathematical problems. - Forbes A viral video on a new app seems like a dream come true for anyone struggling with math. - Time \_\_\_\_\_Want to increase your learning experience? With Photomath Plus, you get:EXPERT EXPLANATIONS High-quality teacher-approved explanations for each problem in selected textbooks, including word and geometry issues! Learn or repeat mathematical concepts at your own pace. ANIMATIONSDemop details that allow you to view and understand each mathematical step. TIPS & HINTSLive your learning by understanding how and why mathematical problems are solved, or remember forgotten terms and concepts with our built-in glossary. • Payment will be charged to your Apple ID account when you confirm your purchase. • A subscription renews automatically unless cancelled 24 hours before the end of the current billing period. • Your account will be charged for renewal within 24 hours before the end of the current period. • Manage or cancel your subscription in your account settings in App Store after purchase. • Offers and prices subject to change without notice. Suggestions or questions? Send us an email at support@photomath.appSite: www.photomath.app Facebook: @Photomathapp Twitter: terms of use of @Photomath: Privacy Policy: November 15, 2020 Version 7.2.1 We regularly update the app to make the study as smooth as possible. Get the latest version that includes bug fixes and general improvements. Move faster, learn better, and get more time for the other things in your life! This is the latest photomath update supported for iOS 11. If you're on iOS 11, update to access the latest versions and features. While there are still 1 or 2 mathematical topics with which this app is still not exactly able to help, it is a WONDERFUL app that can solve about 90% of mathematical problems, be they common algebra or higher-level and harder university equations. However, you want this app on your side when you do math pretty much and of all kinds. Its main function allows you to take photos of mathematical equations, and in case you accidentally have parts of other equations in the photo you took, you can crop them as soon as you take the image and solve the equation for you as soon as you press the OK button. It also has a calculator where you can manually enter equations and solve them. It is useful in case you realized that you wrote a wrong equation, because you can simply go directly to the calculator part and fix it, since all parts of the equation that the app saw in the photo are immediately put in the calculator. The best part, in my opinion, is the last feature where it tells you exactly how it solved the equation, and even allows you to view every single step and gives you a short but good explanation of what's happening in the passage. If you also scroll down while in the same function, if you took a picture of an equation that needs to be graphic, you can actually see the graphic equation for you. It is a very nice app and I HIGHLY recommend it. Okay, this app is amazing, it works wonders! Butttt I have to pay to teach myself how to do it like Bruh. I thought you all have the ad money? Instead of doing that, I have an idea for all of you. Instead of charging people to learn how to do it, but you should have a learning option but not like the one you have now, the learning option should be an option that teaches you how to do it, but instead you actually have to fix the problems and rather take a quiz on it and take it back as much as you want! And up you can charge people because it will be premium. Could include flash cards and games to help you understand the type of math!! People would definitely be willing to pay for an app that teaches well!!! What you've got now dose t do a lot for teaching, but instead you can make a new and improved and FUN way to learn math, math, you can get them to add points to the equation every time you get the right question! And then add an avatar that you can customize but you will need coins to buy what you want, you can earn those coins by responding correctly to the math. Or at least get 7/10 or more right!!! Again this would be main to your wayyy Funner app and teachers could use it as a way to teach and would pay for the program!!! So, adding that they amount to MORE MONEY towards your company!!! Let me know if you use this idea, and thank you for reading ♥♥ My math inst been out since October and we have more substitutes who can barely teach. I started using PhotoMath again because I used it all the time to help me with homework, but that said I found that there is a new feature that I didn't notice. PhotoMath Plus.I was trying to learn how to make an equation when one of the steps needed me to pay for PhotoMath Plus to find out how to use it. This isn't all that useful when I, and maybe other people, want to learn how to do it properly because this is probably the best way they can while they're at home as well. I'd never seen this feature before and hoped developers wouldn't add it, but here it is. I'm not saying it's

terrible and you should remove it, but it's not the most effective way to get more money. In conclusion PhotoMath is literally the best calculator app you've ever used, and I recommended it to others and they have as much fun as I do. Five stars. Developer Website App Support Privacy Statement
