Hercules hooks near me

Hercules Hooks is a way to hang just about everything easily, quickly and without using tools. It has pitchman Billy Mays backing it, so of course it looks like a great invention, but can you really use it to hang things in your home? We looked at this to see what all the fuss is about and see if it's something you should buy or not. Overview The reason there are so many products that try to help you hang things on your walls is because until now it hasn't been a good way to get the job done. The old hammer and nails do not cut it completely, and can leave large holes in the wall when you are done. Other wannabe solutions end up being undone, smashing your picture frame or causing damage to items you've placed on the shelves. There have been many attempts to fix this, including stick gum, hooks that use glue to stick, hooks that use suction cups to hold on. Everyone comes with a disadvantage of any kind. The claim from Hercules Hooks is that it can hold up to 150 pounds of weight, and it is installed without the use of tools, or any major fight. They also say that it just leaves a pinhole, so you don't spoil your walls in the process. And if that wasn't enough, they say that if it doesn't work for you the way you expected it, you can return them within 30 days. Seems like some pretty bold claims for a single product, so can see how it lives up to them. The Hype Putting Billy Mays on the product is all the hype it needs. The guy had an ability to take even the most mundane products and make them must have items. The good thing is he usually got it right. He has some duds on his resume, but most of the products he approved are actually well reviewed by users, and Hercules Hooks is one of them. The cost that you expect, the cost of Hercules Hooks is not very great. You can get a package of 20 for \$15 plus shipping. A package of 20 should be enough to handle most of the hanging needs of your home, so not a bad offer. And remember that this is a one-time purchase, they are not trying to sign up for some stupid auto-ship monthly Hercules Hooks membership or whatnot. The commitment These should actually increase your quality of life, as you don't have to fuss too much to get them hung up, and you don't have to worry about them falling off while you sleep. Evaluation Hercules Hooks could only do one of two things: succeed triumphantly or fail miserably. In this case, they are a success and they act as depicted on all the plaster areas you have in your home. There are a few things to keep in mind when using these. The first is that there may be something behind your wall that will prevent you from turning the hook to get it in place. It could be a stallion or another obstacle. You may just be able to move the hook in a few inches if this is the case. Another thing that have noticed is that if you hang something very heavy on that hook will sink into the plaster, leaving a larger hold than what is depicted in the infomercial. To prevent this from happening, use only more than one hook on these larger elements, so you distribute the weight more easily. If you have these tips in mind, you will no doubt have an easy time with your new best friend and you will have your place finally looking the way you really want it to with all your decorations, family portraits, mirrors, paintings, shelves and anything else that can be hung. The feedback on these is solid, and the few naysayers probably ran into the issues we presented - and resolved - above. Final Hercules Hooks Review Hercules Hooks gets the Thumbs Up review from us, as it's one of those products that has a simple but foolproof design. We like that these are easy to use and do not involve many complicated parts that can end up breaking. A quick jab and a twist and it's in and you're ready to hang whatever you want. It may sound a bit corny, but it's actually therapeutic to have this one thing work, in a world where things don't always work the way you want them to. And you'll be surprised at how much things you'll feel like hanging, now that you have such a safe and easy way to hang them. It's as if your mind was suppressed because you needed a solution to the hanging problem, and now you can let it run wild. Our recommendation We recommend picking up a package of these to take care of any immediate projects you may have in mind, but also just to have useful in case something comes up. You never know what will catch your eye the next time you go shopping and know you have Your Hercules Hooks at home. A quick pass down the home décor aisle, and this could be the start of a new interior makeover. Don't tell me we didn't warn you. what do you think? Does Hercules Hooks work or not? It has the muscle to install in plaster without tools and will hold up to 150 pounds-only press, put and hang. The reinforced steel design needs plaster and braces itself to the back of the wall using a J-shaped leg. Downward pressure on the hook side increases the J-leg's grip behind the wall. Heavy or light, large or small, it hooks, hangs and secures them all. The test: Hanging a heavy painting, a sack of books and a lawnmower in a stud-free part of the wall. The verdict: If you have an urge to decorate but own no tools whatsoever, Hercules Hook works just fine. The details: It worked a little strange to start the test using a stud finder to confirm that we were not on a stallion. But after you see Billy Mays throwing his full weight on a shelf supported only by Hercules Hook's hollow wall anchor, you may feel as willing as we were to suspend your own disbelief. The hook's first trial was an ambitious but not unreasonable 16-pound painting framed in wood and glass, no danger. This is well within the range of most hollowwall hardware – during our abusive lab test of the plaster fasteners, Anchors A-Weigh, the loser of the lineup managed to support 28 pounds, and the winner held up to 35 pounds before breaking free. So we thought we were going to kick it up a notch with a double-bagged sack of hardcover books, which included a particularly dense two-part biography of John Adams. The book bag weighed in at 41 pounds -far more weight than any of our testers would have expected a plaster anchor to hold. But sure enough, Herc held steady as we gently pulled away from the wall. Now that Mr. Mays says so, super strong. In small print on the HH package, you recommend using multiple hooks to distribute the weight of a 40-plus-pound item. But if you drive a series of hooks along the wall, should you not be able to find a stallion within a 16-in span? Our testers, egged on by the unexpected triumph over the literary strain, had little patience for such precautions. So we buckled a bootlace around the handle of a nearby lawnmower, and set about hoisting his 68 pounds on one hook still in the wall. The mower almost made it. Immediately after the hanging, the hook began to cut a ski-slope-shaped gouge into plaster, sprinkling plaster as gravity took hold. As we groped the camera's lens cap, the mower crashed to the floor, just seconds before we could take a picture. The smell of spilled fuel, the dangling bootlace, the broken wall - the whole endeavor had taken on the feeling of a broken crime scene. But Hercules Hook impressed nonetheless, and all witnesses agreed that it would be a nice feast for mirrors, paintings and other affordable objects you want to hang. If the idea of decorating contains something with an engine, though, you should find a stud.
