View the interactive globe here. Exandria is the world title, where most of the events in the critical role take place. [1] Exandria exists in the Material Plane[2], although it has connections to other planes of existence, such as elementary planes protected by astafio. The story [edit source] → Main article: History of Exandria. Since the gods first came to Exandria, four different ages in the world have passed: the founder, the Arcanum age, the disaster, and the differences. Events of a critical role take place in the fourth century. [3] For Exandrian history time, as is now known with dates, see the Article Time line. Calendar[edit source] → Basic article: Exandria calendar. Exandrian year lasts 328 days in 11 months. Each day is 24 hours long and 7 days of the week is named Miresen, Grissen, Whelsen, Conthsen, Folsen, Yulisen and Daleysen. Geographical characteristics[edit source] Continents [edit/edit source] Fan provided a detailed map of Tal'dorei and Wildemount. West Haberlein. Tal'Dorei → Main article : Tal'Dorei (continent). The northern continent[4], which includes the Republic of Tal'Dorei, as well as the Fortress of Singorno, Krahommer Nykšten, the state of the White Stone City and, far south, the Tz'arm Hobgoblin Empire. Issyfra → Main article – Issyfra. The mainland to the north-west of Tal'Dorei, where the Othanzia region is located, [5], where Vasselheim and Pyrah are located. Marquet → Main article: Marquet. On the southern continent, made up of approximately 30 % of the mountains[6] and 70 % of the desert regions[7], there are some bastions of civilization that can be found without Ank'Harel, Broken teeth → Main article: Broken teeth. Not technically a continent, this forty-three island archipelago is southeast of Tal'Dorei, behind a fog bank called Fool's Curtain. [8] Wildemount → Main Article: Wildemount. Located east of Tal'Dorei, this continent is a trade-oriented Clovis Concord west along the Menagerie coast, an austere Dwendalian empire through West Wynandir, and the secretive Kryn Dynasty in East Wynandir. Oceans [edit source] Frigid Deep Lucidian Ocean Ozmit Sea Underdark [edit source] → Main article: Underdark. Underdark is an underground territory in the world of Exandria. In a dark and hostile place, Underdark is almost a world to itself, with civilizations, monsters, politics, economics, and threats that can only interact sporadically or indirectly with the surface of the world. [9] First of all, Underdark has significant links with the Far Spheres, from which many deviations occur. [edit | edit source] has two moons.[10][1][11] named Catha and Ruidus. [12] Catha[edit | edit source] Catha is similar to earth's moon, although it is closer to Exandria and looks higher in the sky. [11] He has a 33-day cycle during which he waxes and disappears. [13] Ruidus [edit | edit source] Ruidus looks smaller in exandria sky due to the further distance from the planet, while its reddish-purple, maroon-brown color contributes to the dimer glow. [11] Lycanthropy is quite unaffected by this moon compared to closer to the moon. [14] It has a very slow orbit, taking all year (328 days) of revolution, and is visible for about half a year. [15] Myths and rumors about Ruidus abound. Some believe that this would either be pre-created when the elements themselves were consuming all exandria. Others believe that at first it did not initially exist, but was a traitor to the creation of the Gods, and there was some sort of long-lasting mysterious plot that was cut short at the end of the disaster. [16] Exandria is a standard belief in various cultures that she is the subject of bad omen. Languages [edit source] Exandria speaks many different languages. Common is the most widely spoken among humanoids, although most races also have their own language.
