Try again in Korean! Play AFK Arena on PC/Mac to enjoy the game! If you're new to AFK Arena and haven't used any code yet, this is a quick review for you! AFK Arena (by Lilith Games) is part of the new Idle games, which make the app store more popular. Players will build a team of five with different factions, classes and abilities to fight against the darkness. Send your Team through the Arcane Maze, race with other players at the PvP Arena, or battle the monster wave in the campaign story. Game Features Your team has five members, two in the front and three in the back. You can choose between six races:Wilders – Forest manMaulers – BeastGraveborn – LightEach class will have different abilities: Wisdom (Magic damage)Power (Physical damage)Flexible (Physical damage)Each race has a race against one (get more damage) and a race to deal extra damage for them. Each hero has their own gears and abilities that can be upgraded throughout the game. Players can choose the squad that suits their style of play and preference. In battle, you can allow heroes to use their abilities automatically or activate them manually. You can gain passive experience and gold even when you are not at war or when you log in. Lots of gifts for new players. Is AFK Arena Worth Playing? The drawing style is very cool and unique in its own way, especially the theme in skill and battle. Heroes can call fire to the phoenix that lights monsters, powering the big ball of light. The theme changes from the old castle garden and moss, which increases the mystery of the battle and also highlights the effects of heroes and skill. Races and skill effect make the game fun to be without finding a variety of new and better combinations. Save AFK Arena Gift Codes to save time! Especially focusing on the Idle part is not like many empty games, players can find other ways to invest time like guild hunting, climb the ranks in the PvP arena or look for a way out of the arcane maze, which is very difficult. But there are also some drawbacks, such as the short tutorial at the beginning, where some players can be difficult to level their own leveling and time if there are no game codes available at that time. And there are only one or two lines that lack the variety of sounds like each character, and the lobby keeps the music again after switching between tabs and fields. After all, it is definitely worth a try, a big and fun game. Hopefully, we found some working AFK Arena codes on this page and have fun with this amazing game! If you have any questions or problems related to recovery progress, please feel free to comment below. We'll do everything we can to help you! Also, feel free to share your new usage codes with everyone! Have!
