Persona 5 intro scene

FlagView HistoryThe following is ign's walkthrough for the introduction of Persona 5. The beginning of the story is long before the beginning of the game, but now is not the time to ask questions. It's time to learn how to be a Phantom Thief! In the first playable section of Persona 5, you'll learn the basics of movement and combat. Follow along where you are told to go and jump up and down the platforms you encounter to get used to the controls. This is a linear path, so don't get lost. Your first fight is just as basic as the motion tutorial. Use the skills of your Persona and your other different attacks to take down the enemy as you learn combat mechanics. Don't worry, there will be more opportunities to learn in the future. A few melee attacks and a Persona capability should be more than enough to take it down. After the fight, head up the stairs in the exit behind you to the next area. Follow the path until you get to a door and go through it. Take one right and you'll get the chance to learn how to sneak up behind someone after a brief bit of NPC chatter. Once the menacing guard runs through you, head up the stairs and the next cutscene will lead. After the cut scenes, you'll get your first taste of dialogue options. Don't worry! None of your choices here will give you stat bonuses or anything like that, so you select what you want. After a few choices, you get to choose your difficulty. As the prompt on the screen says, the difficulty will not affect the story in any way. If you're new to the franchise, easy is a good place to start as the game can be very difficult. Veterans of the series who haven't played P5 before are advised to go for Normal to get a taste of all the new features and mechanics, but Hard is available to anyone who wants the challenge on a first play-through or some other time. The safe difficulty is easiest and is there for players who are either very new to turn-based JRPGs and not sure what they are getting into or for players who just want a casual experience to enjoy the story to the fullest without being inhibited by more challenging gameplay. Of course, you can change this difficulty when you're not in combat. After selecting the difficulty, you get to make a name for yourself. Make up, use your own, or even use the character canon name: Akira Kurusu. The choice is yours! Once you've signed the confession, you'll be interrogated by an entirely new character. Again, answer the questions however you want. There are no penalties or benefits of how to answer here. Let the cut scenes unfold and you'll get your first chance to save the game.
