How to make c-string underwear

Today, when I got dressed, I was complaining about how hot I was. It's 90 degrees today and I can't freshen up. No matter what I wear, I can't stay calm. I was walking through a parking lot with the hot sun hitting me and all I could think about was, man, I'm so hot. I wish there was something I could do to make me cooler. I wore a skirt and flipped her around so I could get a breeze in there and then I realized what was making me so hot. It was my stupid underwear! I'm so stupid. Throughout the summer I wear these ridiculous full coverage underpants and I raise my ass (literally) when I really should use a c string! Chain C would fix all my problems! Wait. Don't you know what a C-chain is? It is an amazing, wonderful and magical product. I don't know if it's really magical, I just assume it is, because otherwise I don't understand how it stays. It's not just for Grandma's panty game like me. It's also for thong girls. I mean, who wants all that stuff on the sides of your thong when you can blow this over your hooha and your ass? I imagine it's like a lace feminine napkin clinging to its lower regions by flexible wire and a prayer. I can't imagine how something could go wrong with this little number! I can't imagine you'd never stop squeezing your cheeks long enough for it to accidentally fall from under your skirt as you walk around the stage at graduation. I can't imagine you'd ever sit fast and you wouldn't have everything in the exact place it needs to be and the cable in the back is exploring your back door. I'm sure these things NEVER happen with this revolutionary piece of underwear technology. Even if things got complicated by a C string, I was so hot, I was willing to take my chances. I'll try anything to freshen up! I was about to order seven of these (and get them embroidered on the front with the days of the week) when a review caught my eye. It was titled This is impressive, except for the puddle of vagina sweat. Well, shit. I was just buying this contraption to avoid a puddle of vagina! You know what? I'll keep ordering one and try it. If I have a sudose vagina, I can always use it as a super cute headband. Find me on Facebook, Twitter or Subscribe by email. Want to read more? Check out my BOOKS! Pssst.... I have a c string and it looks fabulous and fits like a glove! Check it out here. (Don't worry, the photo is COMPLETELY safe for work. Perverts.) Lace underwear hipster panties c women's rope underwear picturesUS \$0.10-\$0.99/ Piece1 Piece(Min. I used the C-String, I know, I know, you're welcome, ladies. I took one for the team on behalf of women everywhere. I did this so you never have to. I also did this because I was genuinely curious about the claims that this underwear (using the term VERY loosely) is very sexy and comfortable, according to your Amazon page. I opted for black lace, because if I'm going to own a C string, I'm fine it's going to have the most beautiful and practical version. Lace Women's C-String Thong Panty , \$2.24, Amazon The first thing I noticed when I took it out of the box was that it was slightly bent out of shape. It's funny, because I too, when I realized I was actually going to have to use this thing. I folded it back to its original shape (which was not too difficult, considering that everything is basically a wire with a little fabric on it. Mmmm, comfortable...), and I put it on. It's pretty easy to use. You just extend your feet a little bit, and place the front lace area against your feminine parts. The c-string only knows where it's supposed to go (its crack in the back) and is where it should be, with a minimum adjustment needed. And then, there I was. Wearing a C-string. It's that simple. Ever since I was in the comfort of my own house, I wandered around using only the C string to get a little used to it. I decided after hitting myself in the mirror that Amazon's claim that this thing was sexy was questionable. It looked like a fancy spine cloth. Hmm, I thought. Maybe my fiancé will appreciate it more than I do? I mean, he's a guy. Guys like little black lace stuff, don't they? Bad, he, too, was a little horrified. What's that? It's not exactly the reaction I expected, but hey, two points for honesty. It's a C string, I answered. (DUH.) You think it's sexy? It's really weird. -FiancéOkay. Therefore, we now know that Amazon's two claims are definitely false. The c-string is not comfortable. It's not sexy either. I decided at least to see if I had any outfits in my closet that I would need to check my C-string for the future. I mean, this thing has to be good for something, right? Here is a list of things in your closet that will never require you to need to wear a C-string:JeansLeggingsShortsShort skirtsmaxi skirtsDressesI does not have any other category of clothing in my inventory of the items listed, and the C string will never be needed for any item in my closet. So I decided try to think of some other creative ways I could use my C-string, as I'm clearly not going to need it for fashion purposes. Idea #1: To catch a back slope from hard-to-reach placesHey, that part of curvy wire is going to do much better as a back slope than stuck in my crack in my ass. Idea #2: A fun slingshot could be had by everyone. And who else can say they own a black lace slingshot? Idea #3: A bridal shower gag I can't guarantee that your future friend won't hate you/think you're a jerk when she opens this in front of her grandmother, but how funny would it be to tell people you gave someone a C string as a gift? Lolz! (Note, any of my friends reading this, I already have a C string, so good try.) I don't expect the c-string to catch it as a popular underwear trend, but in case I do, don't say I didn't prepare you. Pictures: Alexandra Kozinski Giphy So no one likes a VPL. Or, at least, we'll do everything we can to avoid it. But when it's the day before laundry day (Sunday, obsvs) and all you have left are your biggest pair of panties, who cares anyway?! Well, clearly the people who invented the C-string do. Yes, it's one thing and we first found out in 2014. But, after a while under the radar, the C-string might finally be making it big. The C-string is basically a thin piece of wire with fabric around it that can be molded to fit the shape of your crotch. It is a hybrid of sanitary towels/tangas. It looks like this... cstringdirect.com cstringdirect.com C-strings are sold online in cstringdirect.com and now come in a variety of colors and materials, including lace and polkadots. And they seem to be very popular. An owner left a review saying, 'A bride made me try the C String last year. At first, I'd wear it around the house, then under my jeans when I came out. It's quite comfortable, I'd say more than my thongs, even while I was sitting through hours of boring college classes. In fact, you can easily forget that you're wearing it! The real test was a month later on the beach on vacation abroad. I admit that at first I was terribly insecure at the thought of him falling while walking without me nodding and leaving me totally naked (it was a topless beach). But he didn't and provided me with a necessary modesty down there. But I have to admit it was a little fun to see some of the guys do a double shot, but not get to see what they wanted. Explore the C string collection by yourself here. Could you try one? This content is created and maintained by a third party and imported into this page help users provide their email addresses. You may be able to find more information about this and similar content in piano.io Hello, we would like to create our own C-String. We already have a cup protector (athletes use this). Is there any way to do for the cup protector to stay on despite gravity, or despite size/volume changes? (It's for a man.) The person wearing this will be in bed. Therefore, whatever we do the String of (the part surrounding the buttocks area) has to be comfortable. Maybe there's a way to make use of the 3 breathing holes in the cup. ... Marie Claire is supported by her audience. When you purchase through links on our site, we may earn commission for some of the items you choose to purchase. One of the strangest underwear inventions we've seen in a while... Everyone is talking about the C-string, but first things first... what the hell is going on? The images are misleading and the strange shape of the product has confused the Internet. Is it a strange song? Is it a sexy shoe horn? Is it a Victorian torture device? No, it's actually a piece of underwear. And yes, we're serious. The C-string first appeared on our radar in 2014, but it looks like experimental lingerie is making a comeback, online trend as we speak. The goal of the C-string is to avoid a VPL (visible panty line), helping women who were previously forced to take the 'hard' choice between going to command and having obvious underwear lines. Described as an extreme thong, the C-string is essentially a piece of sanitary towel-shaped cloth designed to cover your crotch, held in place by a thin piece of curved wire that goes between the cheeks of the back - the name derived from the more traditional G-string, with the 'C' standing for the curved shape of the wire. The idea behind the strange underwear is aesthetics, comfort and ease - its place claiming that you can pop the C string and it will stay on, in addition to promising that you will forget that you are even using it. Well, don't offend the inventors of the C-string, but the Internet seems to disagree. It's very awkward, explained one critic. I can't see myself using it for more than two minutes, while others came to say that they would actually rather go to command than make the wire thong. Judging by the reviews, we're not sure why the C-string is making a comeback, but it seems more like a novelty craziness than a real underwear trend. We don't know if we're brave enough to join the string movement C. We hate a VPL, but we'd die of shame if someone found one of these in our underwear drawer - it looks more like a sex toy than lingerie and we definitely don't want to endure the awkward conversation that would follow.
