Download fallout shelter MOD APK (unlimited money) version and you own one of the best shelter building games of all time! The game was released by Veseda Game Studio in 2015 with the help of Behavior Interactive in its development. The appeal of the game comes from the fallout action game in the context of an apocalyptic world where humans are finding ways to survive after a nuclear bomb disaster. Since it launched, the game has quickly gained popularity among players and critics. It's no surprise that the game has won many great awards, including Google Play Best, Mobile Games of the Year - 2016 DICE Awards, winners 2015 Golden Joystick Best Handheld/Mobile Games. In an apocalyptic world, your job is to build bunker shelters (called vaults) for everyone to avoid nuclear bombs. Now, joy no longer matters, and everything is left alive and dead. When you build a vault, the user gradually moves to the base. Well, you are the boss, the manager. It is necessary to guide residents to build and expand shelters while searching for food, water and electricity to maintain their lives. Radiation make mice, cockroaches, bugs huge. Attack your base every day because they need to prepare weapons to defend your base. Rooms that can be expanded are available, so be a smart designer instead of building silly ones. When the population starts to get crowded, problems start to appear when you build your base irrationally. Note that large rooms are easier to connect with other rooms than smaller rooms. However, building them takes time and consumes more resources. The construction of power plants and reactors is also important for maintaining base energy efficiency. In fact, we cannot live underground without enough light and some kind of machinery. Rooms far from the power plant need more energy, so you need to build the power plant evenly to save the energy you have. Residents of special system fallout shelters have statistics in the form of S.P.E.I.I.A.L that correspond to strength, perception, endurance.C, charisma, intelligence, agility and luck. If you place residents in a room according to their abilities, they will effectively accomplish the task. For example, strength increases the power plant's manufacturing capacity, charisma is people who attract others through radio. Not only does it attract residents from the outside, but your residents can marry and spawn in your facility, which will help increase the number of residents. In addition to stocking enough food and water, you need to improve the well-being of the inhabitants by givingOrganize the right job they want, or a wedding for a couple. Pregnant mothers have a 100% happiness index. As the population grows, don't forget to upgrade your facilities. Build Lab Fallout Shelter has two types of labs: Stimpack and Radaway. The laboratory is responsible for producing medicines and useful articles in the lives of the inhabitants. When your base is attacked by giant cockroaches, Stimpacks will help you heal and Radaway will help detoxify your inhabitants. This feature is very expensive, but it is better than losing your resident forever. In a chaotic world, despite the dangers, the outside world has plenty of important items and materials to upgrade your base. Get someone out and equip them with enough armor, weapons, stim packs and radaways, and then he'll bring you a lot of valuable material. What is Rush? Rush is a feature that helps you get your operation done instead of speeding up and waiting for it right away. However, this feature is very dangerous. If you succeed, everything went well and no one was hurt. But if you fail, the room where you rush will destroy many things and attract mice and cockroaches to attack.
