John crestani super affiliate 3.0 review

Before I decided to write my Super Affiliate System review, my first impression was not good. I had seen the creator, John Crestani waving a bunch of dollar bills in front of the camera a few times. It's an eyesore, and it involves a get-rich-quick scheme. Because most of such images (eg someone looks ecstatic during the money shower) are associated with scam products that mislead users to a 'shiny object syndrome'. But I'm happy to tell you the Super Affiliate System is legit and it will allow you to learn how to be successful in affiliate marketing. Super Affiliate System is a video-only training program for affiliate marketing. It consists of 50 hours worth of recorded training over 6 weeks that teaches you about CPA (cost per action) affiliate marketing, using paid traffic sources. There is also a free weekly webinar. The training is focused on copywriting skills, research and data analysis skills. Tuition fees aren't exactly affordable for everyone (\$997 one-time fee), but it includes regular messages via email, text, push notifications and voicemail. It provides ClickFunnels templates, meaning that users are strongly advised to join ClickFunnels, which will cost \$97 per month, although it will give you a manual option to add to your own web hosting service. Super Affiliate System ReviewAs its name suggests it's all about affiliate marketing. Therefore anyone looking to make money online but not having their own products to sell may consider participating. But because the course includes marketing tips that work universally, it is also useful for those who have their own materials to sell. The bulk of the training is about paid advertising, meaning you have to be willing to spend money on ads. In return, a paid advertising option will give you a chance to earn a significant amount of income in a short period of time. If you want to become a successful internet marketer without spending money, you will have to spend a long time building a customer base entirely from organic traffic before you can start to see passive income. This is a course and there is no guarantee of success, but if you take all the advice that John and other experts give, you will hopefully see the return on your investment without too many attempts and mistakes. The course is in video format, unfortunately it is not for people who want to digest information in text format, although some information is available in PDF. In summary, the Super Affiliate System is suitable for people who are: Do you want to make success in affiliate marketing in a short period of time. Looking to receive training via video, and willing to spend money on advertising and tools. The six-week training session is programmed as follows. Week 1 - System Setup: Join an affiliate network, create a website and page, join ClickFunnels, create a Facebook Facebook 2 - Setting up Google Ads: Set up Google search ads and display ads, set up Adwords Conversion Pixel. Week 5 - Presell pages and scaling: Split test count pages, how to scale up your ads within your budget. Week 6 - Product Selection: Choose your niche, ClickBank and other affiliate networks, common mistakes to avoid. As you can see, the course is largely focused on paid advertising, what the most marketable products to promote and how you can send potential buyers to presell pages with these products. You will also learn how to find niche products and identify an appropriate market, as well as how to research keywords. You will be provided with useful resources including: Ad swipes: Ad swipe templates in various niches including bizopp (make money), weight loss, skin care, brain enhancement, etc. It includes Facebook Ad swipe files, video ad files, Google Ad swipe files, YouTube video ad, plus 200+ pages worth of bizopp ads. Facebook group where you can also get in touch with other members to help each other. More than 62,000 members are part of the group. Email support: you can expect a response within 24 hours. Internet Jetset Internet Jetset was John Crestani's original course, now it is included in the Super Affiliate System as a free bonus. The training includes how to choose your niche, social traffic, copywriting tips, authority review sites and tips for building your own website. Criticism of Super Affiliate SystemI has seen some affiliate marketing criticize this method as an aggressive hard-sell style, and not fully supporting audience (potential buyers). I would somewhat agree because I think that affiliate marketing is about helping people who are looking for a solution to the problem they may have. Whereas the Super Affiliate System is about yourself as a seller. If you sell, you're lucky, but if you don't, try again. There is no regard for the people who may or may not purchase the products. On the other hand, I am also aware that this is how people earn 6.7 figures. It will be extremely difficult to make money money you keep listening to people's problems and really try to be on their side. You have to sell to survive. Good news is, Super Affiliate System is a very helpful program for users. This means that existing users believe in this system and therefore they can recommend it to others and receive an affiliate commission (see below). 50% Affiliate PayoutsSuper Affiliate System itself may seem expensive at \$997, but the good news is that it is a one-time charge. Even the better news is that it provides 50% affiliate commission if you promote SAS yourself. This means that if you refer to two people, your entire training fee and resources will be paid for. 30-day Money Back GuaranteeJohn offers 30-day no questions asked the money back guarantee if you feel that the education system is not for you. Each online marketing training platform offers a different style and uniqueness. You'll never know if it gives you a perfect business opportunity until you're actually at it. So it's a big insurance policy for you. Although the quality and helpfulness is proven by thousands of existing members. Super Affiliate System Pros and Cons Great if you prefer to learn everything through video lectures instead of digesting from publication materials. Proven pre-narrated templates and ad swipes. Good help and support. 30-day no doubt put the money back guarantee. Expensive. Even if it's one-off. Only training. You will need to be prepared to spend money on web hosting and advertising. Only video training means you have to sit through. Super Affiliate System Review – Conclusion: If you were wondering if the Super Affiliate System was a scam, you now know it's 100% legitimate system that allows to make money online in a short period of time. Like all other internet marketing methods, it requires some trials and errors, plus initial investments. But by following the steps and listening to John Crestani and other experts, it is possible for you to earn six figures a year. The price you pay is your commitment and you will see the return (and beyond, as passive income) by focusing on all the advice you receive. I would recommend the Super Affiliate System.
