Warning This image is graphic tap reveal Click reveal keep up with the latest daily buzz with the BuzzFeed Daily Daily (Pocket-lint) - Game of Thrones is back, with season 5 launched on HBO in the US yesterday, April 12, and simulcast in many other countries around the world. The first episode will also be shown on Sky Atlantic tonight for many UK fans to see it for the first time. Not all UK GoT lovers will be so excited to debut however. In fact, they probably already saw it. Not a star-studded premiere at the Tower of London last month, but through an illegally downloaded RIP, which are now available en masse on torrent sites. And not just the first episode either. Unfortunately for HBO and Sky, the first four episodes of the new series were leaked online before the opening episode even hit US screens for the first time. So if you head to Pirate Bay, KickAss Torrents or any other torrent troves of the crowd you will be able to download and watch episodes from one to four game game season 5 now. But that doesn't mean you need it. In fact, while Game of Thrones is the most illegally downloaded and viewed TV show of all time, we have some good reasons why you need to resist the temptation to watch leaked episodes. Here they are... and none of them is obvious. READ: Don't have heaven? Here's how to watch Game of Thrones season 5 of legally the new series of Game of Thrones is one of the biggest television events of the year and deserves to be viewed in the best possible way. If you don't give a jot about luxurious images and beautiful, cinematic presentation, you might as well read George RR Martin's books. It's really a fire way to discover the plot and storyline yourself without having to look at the excellent vistas, costumes and detail the creators lovingly put on every scene. Watching it in the standard definition is a crime against events on television. The leaked videos are encoded in 720 x 392, which means they must be increased more than two and a half times on a 1080p Full HD TV or monitor. And to keep the file sizes down, they were ripped by poor bits of speed to run, losing a lot of color information and detailing the process. In a word, they look like pants. As with the video presentation, Game of Thrones is best watched by a 5.1 surround sound system. Leaked videos are presented in stereo and, again, not a small enough resolution to hinder the experience of those who really care about the show. As the reported leaked show came from a screener disc sent to a reporter for review, the bottom left corner of all four episode rips has a large blurry rectangle blackout image. This will most likely conceal text announcing the original rightholder or even fingerprint companies sometimes put on their review drives to determine which reviewer source is from in the case of pirated versions available online. As in this case. Although the blurry segment is not enough to hide the action screen significantly, it's off-putting and again contradicts the philosophy of watching episodes in the best possible way. Unless there are still a lot of leaked episodes, you will have to wait four weeks before the next unseen chapter is broadcast for the first time. You may not be particularly concerned about that, but we were at the world premiere of episode one in London and had a similar wait until the show finally begins. To get started, it's a killer when you can't even talk about it with friends who haven't seen the show yet. And we almost forgot what happened before episode two is. So you're warned. Regardless of how highly act downloading the show is illegal, we strongly recommend you resist the urge to watch leaked episodes of Game of Thrones season 5. You might think you're getting before the game to watch them advance in your official openings, but you just really spoil it yourself. Writing by Rik Henderson. Missed Game of Thrones a lot? The Season 8 premiere of the HBO show only set a few records after it aired Sunday night, finally reuniting us with our favorite characters after a year and a half of silence. By variety, 17.4 million people watched episode 1, titled Winterfell, across several platforms that include HBOGo and HBO Now. Even those who look at the usual channel (11.8 million) bested last season's numbers, making it a multi-platform record show, topping season 7's 16.1 million total viewers on all platforms for the premiere. And that's even a mention of everything that's dropped on Twitter. Whether you're watching with a big band as part of a viewing party, or hiding in a house without distraction, a huge part of being Game of Thrones means talking about it online - and the boy we talked about. According to Twitter, the season 8 premiere was the most tweeted about episode ever, with more than 5 million tweets. This is probably why all ten slots in the world twitter trend list consisted of Game of Thrones content. Specifically, viewers were most buzzy about Jon Snow (Kit Harington) learning his true fatherhood, the episode begins altogether, and Jon Snow's magic dragon ride with Daenerys (Emilia Clarke). However, it wasn't a match for Bran (Isaac Hempstead Wright), who was the most tweeted-about character, putting Jon Snow in second place. They are followed by Daenerys, Sansa (Sophie Turner) and Cersei (Lena Headey), who governs the world? Girls (actually, queens). As Variety noted, Game of Thrones viewers have grown every season, with season 7 averaging 32.8 million viewers per episode. With season 8 comprising only six episodes, it becomes more urgent to tune in every Sunday and savor the final moments of George R.R. Martin's story. Of course, the author supposedly has another book up his sleeve - but if you think that the year and a half for season 8 was long, then I have bad news for you about the books. To move on to mainstream content Now, when we've seen how HBO's version of Game of Thrones ends, we all don't want to stand out with the characters who made it through the deadliest winter ever. In this spirit, we decided to explore what might happen next. From the nation's new building to the coming-of-age tales we've robbed, here are the next chapters of the Game of Thrones universe that we want to see on television - which will probably be made before the winter winds or spring dream hit Kindles.Beware: Spoilers are coming. Arya's Western VoyageKas west of Westeros? Get ready to find out. We follow everyone's favorite face worn by assassin, Arya Stark, as she sets sail aboard the SS Sequel and charts the course at the edge of the famous map. Traveling outside the George R.R. Martin universe, the possibilities are endless - giants, new kingdoms, sea creatures - and who knows, maybe even a Star Wars crossover episode. - Nick BushEditor's note: Yes, the HBO exec dumped water on Arya's show opportunities, but the network will see a mistake in their ways when people shout dracarys! your HBO subscription. Sansa Winterfell RiseNow that Sansa won Winterfell's independence, it's time to see the benefits - and dangers - of being in Westeros Switzerland. Do her people accept the Queen without a king (strong female rulers have iffy records in these parts)? Is there any loss associated with all the apparent eyes of Bran? And most importantly, does she continue to wear the badass armor she's rolled out in Season 8? — Henry T. CaseyJon and Tormund's Excellent AdventuresThe Game of Thrones Season 8 at the end sees Jon returning to Night's Watch; Reunite with your milk-loving, wildling vigilant Tormund Giantsbane; and his beloved direwolf, Ghost. It's a great setup for a buddy cop comedy set in the north, as Jon, Tormund and their faithful puppy explore the forest to see what dangers and discoveries await. Without the pressure of his heir to the throne, Jon can return to the famine, killing whatever mysterious enemy appears next. Both Tormund and Ghost can share a big bowl of giant milk. It's going to be a great time. -Mike AndronicoMore DorneMes got a taste of the dorne different culture and gorgeous landscape of season 5, but Westeros's southern kingdom was largely absent until the new prince made the series' final scene appearance. This series can tie some loose ends (is Ellaria Sand alive?), and provide some much-needed respite from the cold lands of Winterfell. Oh, and if the war breaks down, there are plenty of sunlight for us to see what happens. - Phil TracyThe Great Braavos Bake-OffHosted none other than Hot Pie, this show will pit Westerosi-bus bakers before each see who can make the best kidney pie that looks like a direwolf.
