Medical Specialties Nephrology (Primary Specialty) Experience Over 16 years of various experience Credentials Doctor of Osteopathic (DO) helping Doctor of Osteopathic Medicine (D.O. or DO) is a professional doctoral diploma for physicians and surgeons offered by medical schools in the United States. Holders of the D.O. degree have achieved the opportunity to be licensed as osteopathic physicians who have equal rights, privileges and responsibilities as physicians with a Doctor of Medicine degree (MD). Education and Training Dr. Heather L. Haley attended and graduated from West Virginia School of Osteopathic Medicine in 2004. NPPES Info NPI #: 1194947143 NPI Enumeration Date: Wednesday, May 2, 2007NPPES Last Update: Wednesday, May 5, 2010 eRx - She does not participate in the Medicare Electronic Prescribing (eRx) Incentive Program. PQRS - She does report Quality Measures (PQRS). The Physician Quality Reporting System (PQRS) is a Medicare program encouraging health care professionals and group practices to report information about their quality of care. Quality measures can show how well a health care provider provides care to people with Medicare. SPD - It does use electronic medical records (EHR). The Electronic Health Records (EPD) Incentive Program encourages healthcare professionals to use certified EHR technology in a way that can improve healthcare. Electronic medical records are important because they can improve a healthcare provider's ability to make informed treatment decisions. MHI - She is not committed to heart health through the Million Hearts initiative. Million Hearts is a national initiative that health care encourages to report and perform well on activities related to heart health in an effort to prevent heart attacks and strokes. MOC - She does not participate in the Maintenance of the certification program. A Maintenance of Certification Program encourages board certified physicians to continue learning and self-evaluation throughout their medical careers. Dr. Heather L. Haley has primarily specialized in nephrology for over 16 years of experience. Internal Medicine/ Nephrology click for detail Nephrology An internist who treats kidney disorders, high blood pressure, fluid and mineral balance and dialysis of body waste when the kidneys are not functioning. This specialist consults with surgeons about kidney transplantation. Allopathic & Osteopathic Physicians/Internal Medicine click for detail Internal Medicine A doctor who provides long-term, comprehensive care at the office and in the hospital, which manages both the common and complex disease of adolescents, adults and the elderly. Internists are trained in the diagnosis and treatment of cancer, infections and diseases that affect the heart, blood, kidneys, joints and digestive, respiratory and vascular systems. They are also trained in the essence of primary care internal medicine, which includes an understanding of disease prevention, wellness, substance abuse, mental health and effective treatment of common problems of the eyes, ears, skin, nervous system and reproductive organs.
