Summary [Show]NameArena Of ValorPackagecom.ngame.allstar.euThe broadcasterTencentSize SectionMOBAn addition to 1.37.1.6Size392MThe MODNo FeatureAndroid 4.0.3Not only has diverse gameplay, there is depth that Arena Of Valor also attracts players from beautiful graphics, with constantly evolving updates to be able to please players. Although there are some similarities to the very popular game on PC, it is a legendary alliance, but what is better is that Arena Of Valor is a mobile game that increases the comfort and reach of players will be much greater. Gameplay Basically Arena Of Valor has the same gameplay as League of Legends, you will check your generals together with your teammates to fight with the ultimate goal: destroy the opponent's main house. Win only when you destroy the enemy's main house, so avoid too focused on combat, because you have to fight, kill many lives but still lose as usual. The game focuses on individual skills, as well as coordinating teammates, not seriously plow the hoe like other games. Rich game mode So far, Arena Of Valor has many game modes that allow players to experience the game perfectly. The most important game mode is division mode, in which players and their 4 teammates participate in combat battles in 5vs5. Each victory, you will receive gold and 1 star to help you accumulate in order to increase your rank, if you lose, you will still receive gold but with fewer numbers and also you will be deducted 1 star. The game's ranking system consists of the bottom-to-top ranks: Bronze, Silver, Gold, Platinum, Diamonds and Masters, Challengers. Inch When you play against the same people with the same rank as you, so to be able to reach a high level, skills are the most important thing and in addition to the combination of teammates it is an indispensable factor to win. After each season, your rewards match the achieve ranking. To be able to participate in ranking mode, you must have at least 5 generals, when you are not general or do not want to compete, you can participate in the regular tournament. In the regular match you can play against the same PVP 5v5 mode as the division, but in this mode you will not be assigned or lost stars. In addition, there are other modes such as 3v3, solo matches show their own level. In addition, arena of valor has also updated new game modes such as hooking, chaotic fights, fights and especially in the last World Cup, the broadcaster has launched a very interesting football mode for players who can shoot with the World Cup. For those of you who haven't played, you can go to the training game or fight with the machine to be able to know and improve your skills. Many generals give you optionsIn Arena Of Valor, chess is a very important factor in helping players have interesting matches with each position different general roles. Therefore, in order to make the game und tedious, the broadcaster regularly launches new generals with unique skills and textures. Since each general has different abilities, I recommend that in each 5v5 game, one team is filled with positions such as a medium-distance wizard, a higher street fighter, and a gunner, and an assistant traveling with the other. In addition, it is imperative that a killer goes to the forest to make the most of monster resources and have timely support for teammates. To be able to own generals, you need to accumulate gold to buy, in addition to those who have patience and want to own many generals can buy with real money. Rubi is also an important thing in the game, it allows you to buy some items such as yellow X2 cards, X2 XP cards, treasure rotation tickets (which can be revealed to be products) or to open multiple gem boards. Different equipmentTo increase the resistance of the general, equipment is a very important factor. The equipment in the game is very varied with different attributes such as craft, craft, running speed, spells,... to be able to match attributes, some of the general's tricks. One thing I find good compared to the legendary league is that in Arena Of Valor the purchase of equipment is easy, just destroy soldiers, monsters,... Take the gold and you can upgrade the equipment immediately rather than going home to the main one. In addition, the creation of a suitable gem board for each general also increases strength significantly. In each game you can choose to bring an add-on suitable for your generals such as speed, turn, punishment, ... Quality graphics, I'm quite impressed this way, compared to mobile games, arena Of Valor graphics are somewhat superior. It can be said that this game is a mobile MOBA game with the most advanced graphics. The generals of the game are meticulously designed, from costumes, weapons to running, surfing and skills are also depicted in a very realistic and clear way. The sound makes the game more dramatic with fierce fights. Download the game Arena Of Valor APK for Android! played a lot of games, when I play Arena Of Valor I was really impressed. What could be more interesting than robbing Mega Kill of friends or weighing 5 members of the enemy team on your own. The game has addictive gameplay with beautiful graphics that certainly does not disappoint you, do not forget to invite more friends to play to conquer the arena of justice together! All right!
