Rating: ★★★★★ in training offers user-friendly online prep courses at an affordable price for Step 1, Step 2 CK, and Step 3 USMLE exams. App videos are taught by licensed MD instructors and cover a lot of key information. Students have access to large amounts of study materials at a lower cost than many other review courses. Licensed physician instructors provide more than 180 videos in shorter patches to help maintain the process. Videos are particularly useful if they are watched immediately after reading (or at least skimming) relevant chapters in the first aid book. Lectures include interactive Whiteboard training, animations and other memory assistance to hang information. Stage 1 consists of three parts: 1) Prime series, which provides students with unlimited access to 30 films with the most important information tested on USMLE, 2) Part 1 questions, which includes 340 open study questions (10, 3 times a week in batches), and 3) video series Part 2, which includes 70 additional videos. A sample video for Step 1 is available on the website for those who want to check it out first. CK's Step 2 course also includes 50+ hours of videos in addition to video responses to questions. Stage 3 includes 37 videos in addition to other study materials. Doctors in the step 1 training course include many practice questions that are associated with video answers. The course also includes hundreds of animations, illustrations, X-rays, heart sounds, pathology slides, and clinical images to help students remember information for the exam. Personal dashboard and downloadable study guide away from the course. Compare usmle courses above! You can use the detailed and free DIT study plan for different scenarios on your website to plan ahead and get an idea of how many days a week and how many hours you need to complete the schedule before exam day. The study plan shows how many videos you need to watch every day, depending on the number of weeks you have to study. Doctors in training gives their customers several options when they question or need support. The industry standard for student support in most prep courses comes down to email questions and waiting for answers. DIT offers students both live chat and Support. This is especially useful for online learners who often lack direct access to a coach. For a prep course with a good number of quality online lectures in addition to a question bank, doctors in step 1 training courses are very affordable. Priced at \$825, step 1 review period is our lowest cost review option that includes video presentations. Step 2 of the CK Course costs an equally reasonable \$799, and step 3 reviews will only cost you \$249. If you need extra time to check, you can extend step 1 and step 2 of the CK course by a week for an additional \$200 each. The DIT review period only includes quizzes; There is no practice test that simulates the actual USMLE test. Its website includes information about taking usmle step 1, step 2, and step 3 practice exams offered by NBME, however, no full-length practice exams are included in any of the DIT courses. Although some students like to cram for exams at the last minute, limited access time to courses makes it difficult to plan ahead to extend their study time over several months to a year if they don't pay for a 1-month extension. For example, step 1 period only allows for 45 days unlimited access to movie part 2. Some students have reported that certain videos are less useful because lectures are too wordy or contain information that is not necessary for the Step 1 exam. Busy medical students obviously prefer a brief presentation of the most important information to maximize productivity. There is some criticism from providers who are trying to bring their speeches to life by entertaining at the expense of providing valuable information or strategy at the same time. Online video lectures DIT and Question Bank are useful tools to prepare for USMLE at an affordable price. The course would be stronger if it also provided practice exams to prepare students for real exams, and if lectures are simpler and more focused on the high-performance information that is covered in USMLE exams. Those who learn best by watching video lectures and working through video problems will gain more from DIT courses. The bottom line is that DIT is a good resource when used in addition to one of the larger review companies, such as UWorld or Kaplan. Many students also find stage 1 DIT courses more useful than stage 2 CK or step 3 courses. More than 180 videos to prepare students for step 1, step 2 CK, and step 3 USMLE 800+ tests of images, images, graphs, charts, animations, X-rays, and pathology slide student support via live chat and email phone questions study practice questions with video answers for all three stages study tips and Quizzes downloadable PDF study guide calendar step 1 course review : \$825 Step 2 CK Course Review: \$799 Stage 3 Course Review: Extending a week of Step 1 and Step 2 CK course: \$200 each.
