Ject root word adverb

Getting acquainted with Greek and Latin origins, as well as premedos and premedo elements, can help students understand the meaning of the new word. This article includes many of the most common examples. In this article: Common Latin roots Common Greek roots Common prefixes Common suffixes Many English words are formed by taking basic words and adding combinations of prefixes and suffixes to them. A basic word that a factor (presmedo and a factor) is added called a root word because it form the basis of a new word. The original word is also a word in its own right. For example, lovely words include the word love and the post-ly. On the contrary, a root is the basis of a new word, but it does not usually form an independent word of its own. For example, rejection is made up of the pre-re- and Latin roots, which is not an independent word. Download a copy of the Common Latin Roots chart below. Common Latin Roots Latin RootDefinitionExamples ambibothambiguous, ambidextrous aquawateraquarium, aquamarine audio hearaudience, audition benegoodbenefactor, benevolent centone hundredcentury, percent circumaroundcircumference, circumstance contra/counteragainstcontradict, encounter dicto saydictation, dictator duc/ductto leadconduct, induce facto to makefactory, formhapeconform production, fortstrengthfortitude reform, fortresses fracto breaking fractures, projections, refusal of judgment, malbadmalevolent prejudice, malefactor maternothermaterial, maternity mitto delivered, admitted mortdeathmortal, mortician multimanymultimedia, many paterfatherpaternal, father port to carryportable, transport ruptio bankruptcy, interrupt scribe / notes to write inscriptions, sect regulations to send g dao, indignant audience viewing, audience building, restructuring vid/visto video viewing, tv voice; to call vocalize, advocate Download a copy of the Common Greek Roots chart below. Popular Greek Roots Greek RootDefinitionExamples anthropoman; people; humanityanthropologist, charitable autosefautobiography, automotive biolifebiology, chrontimechronological biography, chronic dynapowerdynamic, dynamite dysbad; hard; unluckydysfunctional, dyslexic gramthing writtenepigram, telegram graphwritinggraphic, phonograph heterodifferentheteronym, homosamehomonym heterotero-homosamehomonym, homodwaterhydration homodwaterhydration, hypobelow dehydration; beneathhypothermia, logystudy hypothesis of biology, metric psychology / thermometer metmeasure, microsmallmicrobe circaference, microsingng mis / misohatemisanthrope, misogyny monoone monologue, monotonous morphform; shapemorphology, morphing nymname antonym, phillovephilanthropist, philbiatfearclaustrophobia philosophy, phobic phon soundphone, symphony/phoslight photo, pseudofalse phosphorus pseudofalse pseudosoul pseudoscience; telescopes, technoart telescopes; science; Skills skills, oftelevision telecommunications technology, thermal thermheat phone, thermostermal a method of understanding the meaning of new words is to analyze different parts of words and meanings of those parts. Many new words are formed by adding an element to the beginning or end of a Latin or Greek descent or from the root. When the additives are added to the root head or from the root, they are called prescites for example, the most common premedo premedo certainties are un-, meaning not oropposite's. If you add un- to the word happiness, the new word becomes unhappy, which means unhappy. When the additives are added to the end of the root or from the root, they are called the element. The most common post element is -s and -es, which means more than one (or more number) of words. Add -es to desire, change the meaning o word to more than one desire. (2008). The reading puzzle: word analysis. Thousand Oaks, CA: Corwin Press. (Note: Comments are owned by the person who posted it. We are not responsible for their content.) ject, jec & jec & jec ROOT-WORDS is JAC, JEC & JECT means THROW & LIE. One oddity about this ROOT is that it never stands alone, as other ROOTS do. Standing alone, it doesn't make sense. It completely depends on the premedo and the meaningful premedo factor. 1. Dejected : de JECT ed (de ed) adj. Low in spirit; Throw down 2. Dejection : de JECT ion (de jek'shun) n. A desperate situation; Depression 3. Adjacent: AD JAC ent (jas 'ent ad) adj. Next to it: Like, adjoining house 4. Ad: ad JECT (a jekt) v. To add: Appendix 5. Antho say: ive (aj' ek tiv) n. Don't stand alone; a nod word that amends nodly 6. Ad JECT ival (aj ek tie' val) adj. Use multiple appnolybs; like, a type of 7. Conjecture: conjecture (kon jekt) etc. Planning: to conjecture 8. Conjecture: con JECT ure (kon jek' chur) v. To form an opinion; to conjecture 9. Ejaculation: e JAC ulate (e jak' yu late) v. To throw out; cry out 10. Eject: e JECT (e jekt) v. To throw out; Like, push him out of hall 11. Launcher: e JECT ion (e jek 'shun) n. Throwing out; deportation 12. Injections : in JECT (in jekt) v. For insertion; like, inject a syringe 13. Injection: in JECT ion (in jek'shun) n. The throwing of the liquid with a syringe 14. Interjection: inter JECT ion (int er jek'shun) n. A word thrown among others; as, He went, alas! Dead 16. Protest: ob JECT ion (ob jek'shun) n. Not approved; refusal to accept 17. Projection: pro JECT ion (pro jek'shun) n. A throw forward; as, a projection of voice 18. Rejection: re JECT ion (re jek'shun) n. Refusal; refusal; as, a rejection of his offer 19. Abject: ab JECT (ab' jekt) adj. Recession; debased 20. Abjection: Ab JECT ion (ab jek'shun) n. Abasement; Recession Elymism IndexFrom ject to HOME Unless anyone raises serious objections, today we will talk about the Latin word ject meaning 'throw.' Do you remember when your classroom teacher used a projector, which 'threw' the image up on a screen for a presentation? Sometimes students object to this, or 'throw' their thoughts against it. Often students feel subjected to too many presentations, too often being 'thrown' under their boring burden. Do you remember as a child getting an injection at the doctor's office where a nurse would 'throw' the drug into your arm with a shot? You may have tried to deny this attempt by 'throwing' it back into the shot giver. Often frightened children alternate or 'throw' between the shot and their bare arms many cry of terror and alarm, hoping to disrupt the progress of painful syringes! Interestingly, our word jet comes from the ject as well, for a jet is 'thrown' through the air by its engine. Jets often follow trajectories, or the paths on which they are 'thrown'. Sometimes a jet, or more often a ship at sea, is forced to dispose of unwanted luggage, thus 'throwing' it into the sea. Another word to 'throw' something out is to push it out, such as pushing out a DVD or CD-ROM from a computer. Sometimes in an experiment, we must come up with a guess, or guess it's 'throw' together based on available evidence. If we don't guess correctly, we can become depressed, that is, 'throw' or drop down, thus becoming depressed or blue. Now you will never have to reject or make a wild conjecture about an unknown word containing the original word conjecture, as it was permanently 'thrown' into your perception of the word origin! Projector: which 'throws' out objects: 'throw' the object way: 'throw' under injection: a 'throw' in denial: 'throw' back interject: 'throw' between jets: 'throw' in sky orbit: path 'throw' over jettison: 'throw' out push: 'throw' out conjecture: guess 'throw' together dejected: 'throw' down or turn off the furnace This week , we want to focus on the root word, which means throw. A lot of common English words are derived from words, and if you think about what they mean, they often have something to do with something being thrown one way or another. If you've ever learned a language, even briefly (in a short time), or participated (joined) in a Spelling Bee, it's most likely that you've encountered the root word. A root word is the main word on which a series of words are based (established on, built on). Many of the original words in romantic languages (Italian, French, Spanish, Romanian and Portuguese) come from Latin, which is why many people think it is important to learn Latin at school. Knowing a lot of root words makes it easier to learn many languages, including English, for example, from the root Err! We've compiled a list of words with the original word, along with definitions from Merriam-Webster, to help you remember these words that are often thrown about! Subject (v): to oppose something solid and often with words or arguments, to throw your opposition to something For example, politicians oppose changes in the proposed law. Project (v): to throw or mold forward, to put or pose: present to look, to cause to jut out Example: The house seems to project from the cliff face (cliff edge), which would be bad news if an earthquake hit. Bullets (n): a body that is projected (thrown) by external forces (energy) and continues to move according to its own inerability; Special: a rocket for a weapon (gun, etc.) For example: The boy threw the bullet in the middle of the class to distract the teacher. Projector (n): a device to project a beam of light or throw an image against a wall. For example, if you can all please turn your attention to the projector image on the screen, I want to show you some charts. Refusal (v): refusal to accept, consider, submit, perform for a number of purposes or uses. To throw away an idea. For example, she turned down his marriage offer. Injection (v): to put on something powerful, to tie a liquid in (as for medical purposes), to throw into something. For example, I hate photos. The last time I went to the doctor, she injected me with vitamin B12. Orbit (n): the curve along which something (such as a rocket) moves or is thrown through the air or through space For example, You can follow our flight trajectory on the screen on your seat. Interject (v): to throw in the middle or between other things For example: Sorry, she alternates. Can someone help me, please? Conjecture (n): an opinion or idea is formed (thrown together) without sufficient evidence or evidence For example: Yes, there is not any evidence to support your claim, all this just seems conjecture. Jet (n): What is an engine-equipped aircraft (thrown into the air) by one or more jet engines For example: What is your favorite part when flying in a jet? Jettison (v): to remove (something): refusal (something, such as a plan or idea), to throw out and the idea For example: He threw away the idea after his boss complained about it. Eject (v): to throw out especially by physical force, authority, or influence For example: I can not push the CD! It's stuck in my computer. Boredom (v): sad because of failure, loss, or discarded (as in rejected or set aside) Example: Do not look so dejected! You'll do better on your experiment next time.
