## The Art of the Middle Game

Chester Bennington. He should have played. Hardly any opening leaves such a clear-cut impression on the subsequent course of the game or dictates The Art of the Middle Game much what policy one should adopt in the middle game as the Sicilian Defence. Rodrigo Bottero. No trivia or quizzes yet. He was equal first with Bronstein in the Soviet Championship, won first prize at Venice and gained first place in the great Interzonal Tournament at Stockholm in He is prepared to allow White a certain pawn preponderance in the centre provided that in return he is able to concentrate on a counter-attack on the Queen's side: an excellent plan that has proved its worth in many a The Art of the Middle Game game and one that would work here too — always provided Black sticks to his plan. When, as nearly always occurs, White plays an eventual P - Q4 in order to gain control of this vital central square, Black will exchange off pawns and try for pressure along the QB file. All the greater his disappointment and surprise when the game refuses to do any such thing; in no time at all his plus-minus becomes first an equals, then a minus-plus, and finally a dead loss. Two sure ways of spoiling a good attack or of collapsing in defence lie in adopting a piecemeal policy, or, still worse, in simply drifting. This plan in fact must arise naturally and logically out of the opening. But now comes the logical follow-up of White's plan. He is also noted for his books on chess, in particular a study of Alekhine. Switching over to the Queen-side openings we can readily see how the best defences there prescribe clear-cut and well-thought-out plans of play for the middle game. The Art of the Middle Game White's middle-game plan against the Dutch Defence positions consists largely in taking advantage of Black's bad QB and in frustrating his opponent's development of his Queen's side.
