That's the learner's task, and only the learner can do it. Dec 21, Naman Bansal rated it it was amazing. Holt's book calls for kids to be more engaged in what they do; for educators to link education to the world we live in without creating an artificial and ultimately sterile "academic environment". It definitely wasn't perfect, there were certain *How Children Fail* where the spelling and grammar made it difficult to understand what was going on.
