could've done without the two opening, academically dull essays honestly, it's a bunch of common sense gussied up in boring professorial talk -- and frankly, they don't seem to fit with the rest of the book's content--there's some very interesting and helpful tidbits by a slew of professionals.

For me the absolute highlight was Aaron Dries' interview, plus the full screenplay for his short film, Placebo. Not only did this successfully entertain, it was an excellent example of teaching via illustration. Now, if you're a casual horror fan, looking for a fun read, this probably isn't the book for you. But if you're hardcore into horror films and are pursuing a screenwriting career, this must be on your bookshelf. May 28, Kelly Rickard rated it it was amazing. Review copy The Definitive guide to filmmaking and film makers by the best in the field. An insightful and interesting book full of fun facts and stories that only people in the business would know about. Some of the people in this book I knew of, others I don't know but all I had interesting tips about screenwriting, their favourite films, favourite books and other parts of the horror film industry. Great material and advice from the pros as well as a touching tribute to the late and great Wes Craven.

It's a series of pieces about making horror movies, including interviews, essays and mini-features on every aspect: writing, pre-production, directing, producing, money-raising, editing, promotion and distribution. Some of it is useful and informative, like the sections that specifically advise would-be filmmakers on how to go about it; some less useful but equally entertaining - the long interviews with George Romero, Wes Craven and John Carpenter make it a worthw I thoroughly enjoyed this book. Some of it is useful and informative, like the sections that specifically advise would-be filmmakers on how to go about it; some less useful but equally entertaining - the long interviews with George Romero, Wes Craven and John Carpenter make it a worthwhile purchase for any horror movie fan.

Mostly, I found it inspirational. It includes so many stories of how films came to be made despite difficult circumstances, or how people got themselves involved in the industry. While all the interviewees and contributors are based in horror, all of the information is equally valid regardless of genre. It's an ideal gift for anyone who dreams of making movies.
