As long as "The Machine" a restoration device of Celestial origin; possibly the Earth itself [52] keeps running, any destroyed Eternal will eventually return, as was the case with Ikaris after he was completely vaporized by a particle accelerator as part of a series of "experiments" performed upon him by the Deviants. This same cosmic energy can be channeled for a number of superhuman abilities. All Eternals are potentially capable of:. Some Eternals choose to focus on a particular power in order to increase their effectiveness with it.

Sersi , for example, has developed the power of transmutation further than any other Eternal. Additionally, some Eternals choose to focus their cosmic energies into other, non-standard abilities. Ikaris , for example, channels cosmic energy to greatly enhance his senses, while the Interloper uses his to generate fear in others, and Makkari uses his cosmic energies for superspeed. The recent retcon of the Eternals' origins and abilities introduces a significant limitation to their powers, and possibly to their free will, with numerous references to Eternals being "programmed" or "hardwired.

Furthermore, Eternals are compelled to attack and neutralize any being that attempts to engage any Celestial with hostile intent [56] — this compulsion extends even to the Dreaming Celestial, whom the Eternals were forced to defend even as they feared that the newly awakened Celestial would destroy all life on the planet. At least as presented in Gaiman's Volume 3, the Eternals are aware of their role on Earth, and the duties and constraints placed on them by the Celestials. Ikaris rather sardonically describes himself as "a humanoid-based repair and maintenance unit left behind by unknowable alien gods to make sure that the earth is still here and in good shape when they get back.

We are the court of last resort for humanity and for all living things on Earth. Countries are lines in the sand, empires rise and fall. We are timeless. We will still be here tomorrow, and a hundred centuries from now. The Eternals are split between five different generationals groups: [57]. The Eternal is a series from Marvel's MAX imprint written by Chuck Austen , based on an idea he had been working on for a while: "I pitched this back when I first started working at Marvel, but Joe Quesada was against doing it. He saw no future in this particular old Kirby concept. In this version, we take some of the concepts from [the original series] and build around them, throwing away some stuff and keeping others.

We're actually going back in time to see Ikaris birth and development on Earth, meet his parents, and then move forward into contemporary time.

When we get to contemporary time, the Celestials return to judge Earth, but there's no fifty-year 'study and evaluation period. Originally planned as an ongoing series, [58] it was cancelled after six issues. Reception of the series was mixed. Peter Sanderson calls it "a ghastly mini-series A number of the series featuring the Eternals have been collected into trade paperbacks :.
